

TALON Standalone CD/DVD R Duplication System

TALON introduces the new Standalone System, the latest in auto-mated CD / DVD R duplication technology!! Now users can easily duplicate multiple CDs or DVDs with the ease of a paper copying machine, at an affordable price. Since no PC is needed to run the Standalone, virtually any user can now run CD and DVD duplication jobs. Simply load your Master disc in the reader, a blank disc in the recorder, fill the input hopper with blank discs, and press the Start button. Continue loading the input hopper until your job is finished. It's that easy!! Sophisticated internal board level technology and proven robotics make the Standalone the most reliable automated duplication system available, from the leader in CD and DVD R duplication technology, TALON. Call today for more details!!
